OUR MISSION

Our mission is to EXCITE~EDUCATE~ENCOURAGE children and teens to explore and develop their interest in STEM related fields. We EXCITE children by introducing them to STEM in a fun, experiential, and hands on way. We EDUCATE children to the importance of advancing STEM careers as well as skill building including the ability to problem solve, think critically, troubleshoot, communicate effectively, and manage projects. We ENCOURAGE students to participate in our Leadership Development Training program which also includes entrepreneurial skills—the ability to see the “bigger picture” context of their work and to tackle problems in creative and innovative ways. In addition, students develop interpersonal skills as they work together to solve problems and overcome challenges.

e3 Robotics is a registered non-profit 501(c) 3 organization with visionary leadership to assist students, educators and industry as we forge ahead in the 21st century. Our programs are results-oriented, research and inquiry based.

INNOVATORS

The team was formed in 2014. Our students are from many different schools in the surrounding area of Guilford County and Davidson County. Active team members decide which tournaments they would like to compete in during the year. Our program is year round which provides continuous learning for students.

Teams are a way for youth to share the success of what they have learned and accomplished collectively through competition. Teams share the victory together by receiving awards for their hard work, creativity and diligence. Our focus is to reach any student who has an interest in robotics and give them the skills to build and compete in a friendly environment.

Our team members are involved in:

- Robotics demonstrations
- Outreach
- Assisting with e3 Robotics and MATE competitions
- Skill development and leadership training

Important Information

Monthly Parent Meetings

Historically, teams who have parental support are more successful. We need everyone's assistance in order to grow the students and the team.

Starting in September a parent meeting will be held every other month. Parent meetings will be held on the same week of each month from 2:00—3:00 at 1715 NC 68 Oakridge.

Calendar

The calendar is for the up and coming season. We do our best to include relevant information. However, the calendar will not have the dates for tournaments, as some dates have not been released yet. Team members will receive updated information during team meetings. Team members are responsible for updating their calendar and sharing information with their parents between parent meetings.

Absences

Active participation by all team members is critical in order to have a successful team experience. Please let the coach know you will not be attending .

Joining the Team

Team Membership

There is a 3 three month trial period where your child can participate in all weekly meetings, activities and events. The cost for participation is \$75.00. These fees will be applied to the yearly team fee. Once a student has been invited to join the team they are considered a team member and can apply for leadership positions. Students who fail to abide by the team bylaws may be asked to leave the team. Team membership is not guaranteed year to year and is based on attitude, attendance and motivation. The yearly team fee is \$300.00 and can be paid in quarterly installments of \$75.00.

Our program is student based with our objective to build and compete in a robotics tournament while learning new skills and making new friends.

Team Meeting Locations

We meet once a week on Saturdays at 1715 NC 68 Oakridge, NC.
